**Satic's injection mold increases production of energy saving products**

**Missoula, MT March 22, 2013** – Satic USA, an American manufacturer of energy saving products, has announced that it has implemented a new injection mold for creating polycarbonate enclosures for manufacturing its Power Perfect Box, a wire-in model of its Energy Saver solution. Satic works with RAM Enterprises of Florence, MT to create the enclosures.

Satic uses American made parts and supports local Montana businesses to produce its Energy Saver line of products. The new mold will allow Satic to both increase production and lower costs of its Power Perfect Box, a whole home energy management system.

Satic's Power Perfect line combines the highest quality analog and digital components and delivers the latest advancement in energy saving technologies with the following features and benefits.

**The GES features provide:**

Electrical System Optimization  
Electromagnetic Field (EMF) Reduction  
Voltage regulation and surge protection  
Power Quality & Phase Correction  
Negative harmonics & electrical noise reduction

**The GES benefits provide:**

Reduced electrical consumption  
Consistently increased efficiency  
Guaranteed protection  
Increased life and performance  
Clean power/clear audio & video

--MORE--

Global Energy Savers will condition, optimize and regulate a home's electrical system in real time. The delivery of clean power will consistently reduce heat, amps and consumption as well as the harmful effects caused by EMF's, electrical noise and negative harmonics on the system, all of which quickly translates to reduced costs.

Satic's Global Energy Savers are offered as both plug-in or easy-to-install wire-in models. The Power Perfect Box is a wire-in model that comes with everything necessary to be installed quickly by a licensed electrician at the electrical distribution panel.

**About Satic USA** – Satic USA is a UL listed American manufacturer of quality, highly efficient lighting and energy management products. Satic is committed to the engineering, development and manufacturing of energy saving products designed to be inexpensive, easy to use and truly effective. Its products are sold nationally as well as internationally through resellers and distributors. Satic actively seeks dealers, resellers and distributors to expand its distribution networks nationally and internationally.
