Satic USA announces new whole home energy management system

Missoula, MT March 22, 2013 – Satic USA, an American manufacturer of energy saving products, has announced a new whole home energy management system. The package includes either plug-in or wire-in Power Perfect Energy Savers, and up to 34 highly efficient, Energy Star rated SaticPulse lamps. By simply switching out the current lighting and using Satic Energy Savers a homeowner can effectively clean and protect the entire electrical system. The Power Perfect Package will greatly reduce both harmful EMF's and electrical use, while protecting expensive electronics and appliances, and saving money!

Satic's Power Perfect Package is offered with either plug-In or wire-In Energy Savers. The plug-In model comes with two easy to install ES120 Global Energy Savers, while the wire-In models come with either a ready-to-install Satic Power Perfect Box or Satic Power Perfect Box Heavy Duty for a quick and easy install by a licensed electrician at the electrical distribution panel.

SaticPulse light bulbs are known for their high efficiency and operate with over a 92% power factor. Most CFL bulbs operate inefficiently with less than a 75% power factor and introduce disruptive harmonics into a home's electrical system.
